

ACI Meta Coach — Whitepaper

L'intelligence émotionnelle au service du Web3

Version 1.0 — Octobre 2025

1. Executive Summary

ACI Meta Coach is a next-gen artificial intelligence combining emotional analysis, smart concierge functions and strategic guidance. Designed as a true personal Jarvis, it detects emotions, manages daily routines, boosts performance and helps users reach their goals — whether in trading, entrepreneurship or self-improvement.

The ecosystem runs on AI, voice analysis and blockchain.

The ACI token acts as the access key — unlocking premium features, staking rewards and governance rights.

2. Vision & Problem

Modern life overwhelms individuals with information, stress and decision fatigue.

Most people lack the structure and emotional balance to sustain growth in trading or business.

ACI solves this with a personal companion AI — one that understands emotions, builds routines and turns ambition into concrete action plans.

3. The Solution: ACI Meta Coach

ACI Meta Coach is a multimodal AI that can:

- Read tone, mood and voice patterns;
- Act as a mental coach and organizing assistant;
- Provide personalized recommendations;
- Connect with your daily tools (calendar, messages, tasks);
- Integrate seamlessly with ACI's training programs.

4. Emotional AI & Smart Concierge

More than a chatbot, ACI listens, detects emotional cues, and adapts. It can suggest breathing when stressed, focus boosts when productive, and manage scheduling, reminders or bookings autonomously — creating a calm, efficient, human-like experience.

5. Entrepreneurship & Business Coaching

ACI includes a business discovery engine:
It analyses your skills, budget, time and personality;
Suggests profitable business ideas tailored to you;
Builds a 90-day action plan;
Coaches you through marketing, execution and consistency.

ACI is thus the first AI that truly helps you find and build the right business, not just trade.

6. Trading & Education Integration

Inside ACI's learning platform, the coach adapts to user emotion and skill level, offering voice-based feedback and stress detection during trading sessions.

It supports focus, discipline and emotional control — the three pillars of lasting performance.

7. Ecosystem & Tokenomics

Token: ACI (ERC-20, Ethereum)

Total Supply: 120 000 000 000 ACI

Use Cases:

- Premium access to ACI Meta Coach
- Payments for trainings & AI services
- Marketplace discounts
- DAO governance
- Staking rewards

Allocation Example:

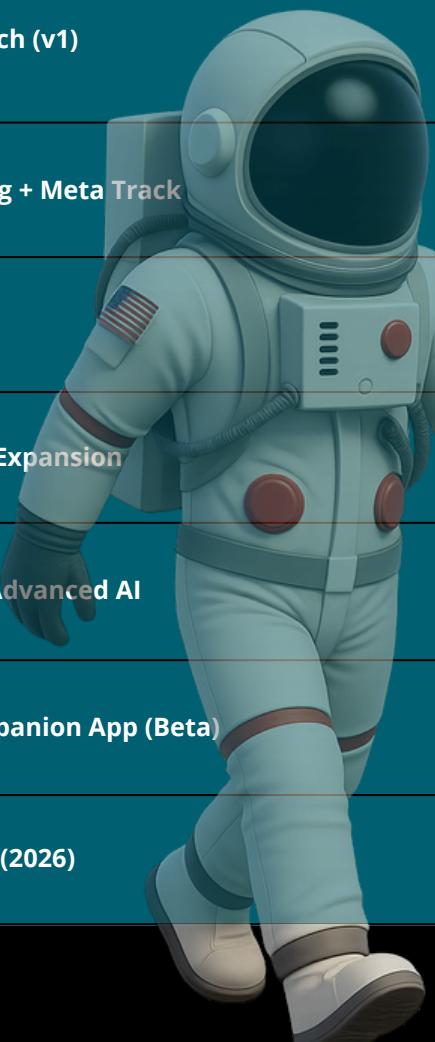

Allocation	%	Details
Team & R&D	15	24-month vesting
Staking Rewards	25	Community incentives
Liquidity & CEX	20	Listings & MM
Ecosystem Fund	20	Partnerships & AI R&D
Public Sale	15	Presale & ICO
Reserve	5	Future expansion

8. Technical Architecture

- AI Core: voice & sentiment models, NLP, tone detection.
- Security: encrypted storage, anonymized user data.
- Blockchain: token, staking, DAO, marketplace smart contracts.
- Hybrid Infrastructure: secure cloud + local app logic.

9. ACI Meta Coach Roadmap – 2025-2026 Vision

The evolution of ACI Meta Coach unfolds through eight strategic phases, each designed to strengthen the ecosystem and deliver a fully integrated AI–Blockchain–Education experience.

1. Ecosystem Creation	Launch of the ACI identity, official website, and ERC-20 token on Ethereum. Establishment of the technical and visual foundations of the project.
2. AI Coach Launch (v1)	Release of the first version of the emotional AI assistant capable of analyzing tone, stress, and behavior — including the first Business Finder demo and trading coaching features.
3. Smart Learning + Meta Track	Deployment of ACI's interactive learning modules (trading, mindset, entrepreneurship) with the Meta Track system, which tracks emotional progress and discipline.
4. Staking (Live)	Activation of staking for ACI holders, enabling reward generation and participation in the network's long-term stability.
5. DAO & Global Expansion	Launch of the ACI DAO, allowing community governance and international expansion through partnerships and ambassadors.
6. MetaVerse & Advanced AI	Creation of an immersive 3D environment where users can interact with their AI avatar and receive real-time feedback and insights.
7. Global AI Companion App (Beta)	Beta release of ACI Copilot , the all-in-one application that combines AI coaching, trading guidance, business strategy, and smart concierge services.
8. Public Launch (2026)	Global rollout of the ACI Copilot app (iOS, Android, Desktop), full synchronization with staking, and DAO governance integration.

10. Compliance & Long-Term Vision

ACI commits to ethical, privacy-focused AI.

All emotional data are encrypted and user-controlled.

Regulatory alignment: GDPR, KYC/AML, Web3 standards.

Long-Term Goal:

Build the first universal personal AI — an assistant that understands, acts and evolves, powered by blockchain value loops.

ACI Meta Coach aims to become the first universal Web3 personal assistant, merging artificial intelligence, emotional awareness, business strategy, and decentralized finance into a single, secure, and human-centered ecosystem.
